

FOR IMMEDIATE RELEASE

## **Rusch to Lead Engineering at Douglas Scientific**

*Alexandria, MN, January 31, 2009* – Douglas Scientific, a division of Douglas Machine Inc. and provider of patented array tape automation for bioscience laboratories, announced today that Terry Rusch has joined the company as Director of Engineering.

Douglas Scientific enjoys significant market traction related to its revolutionary technology platform based upon a patented continuous array tape media with embossed wells. Rusch is not a stranger to this technology. During his tenure at Marshfield Clinic, a leading center for genetic research, and at Prevention Genetics, he had direct experience with the chemistries, processing, instrumentation, and throughput that could be realized with the array tape platform in those laboratories.

Rusch has a background in bioscience and mechanical engineering and will be responsible for the research and engineering of Douglas Scientific's products. He has been a featured speaker at industry conferences on various topics related to high throughput screening.

"We are thrilled to have Terry join our team," stated Dan Malmstrom, General Manager of Douglas Scientific. "He is steeped in the biomedical sciences and engineering, and brings a practical perspective about how our products can transform laboratory processing for our clients."

### **About Douglas Scientific**

Douglas Scientific provides a revolutionary technology platform optimized for laboratory processing in embossed wells on a continuous array tape. Douglas Scientific is a division of Douglas Machine Inc. with corporate offices located at 3404 Iowa Street, Alexandria, MN 56308.
