

FOR IMMEDIATE RELEASE

Thoreen Joins Douglas Scientific

Alexandria, MN, July 22, 2011 – Douglas Scientific, a provider of Array Tape™ for high throughput screening in bioscience laboratories, today announced the appointment of Brian Thoreen to Client Executive.

“Brian’s industry leading experience and academic accomplishments have uniquely equipped him for this opportunity,” says Craig McLain, Vice President of Market Operations at Douglas Scientific. “His strong chemistry and scientific background will prove invaluable to our clients.”

Prior to joining Douglas Scientific, Thoreen worked in Life Science Research and Development solutions at Beckman Coulter where he was honored several times as a top Life Science representative. “A focus on excellence has no substitute,” said Thoreen “Douglas Scientific is in a position to change the world in uHTS, and my goal is to bring this product to everyone who has a need.”

About Douglas Scientific

Douglas Scientific is dedicated to making our world a better place by delivering innovative laboratory automation. Array Tape is engineered to be a ubiquitous media for high throughput processing, driving more data at lower costs. The ultra high throughput Nexar (liquid handling system), Soellex (thermal cycler) and Araya (scanner) are optimized for Array Tape and virtually eliminate manual handling and complex robotics required for microplate-based systems. Douglas Scientific is a wholly owned company of Douglas Machine Inc., with corporate offices located at 3600 Minnesota Street, Alexandria, MN 56308.
