

FOR IMMEDIATE RELEASE

Van Gaal Joins Douglas Scientific

Alexandria, MN, July 22, 2011 – Douglas Scientific, a provider of Array Tape™ for high throughput screening in bioscience laboratories, today announced the appointment of Tami Van Gaal to Market/Product Manager.

“Tami brings an excellent blend of science and product management acumen to our growing team,” said Darren Cook, Director of Business Development at Douglas Scientific. “Her ability to understand customer needs, assess product opportunities, and manage technical resources will enhance our ability to deliver Array Tape solutions to targeted markets at a faster rate.”

Over the last 15 years, Van Gaal served as the face of Wagner Greenhouses where she managed the young plant product assortment while meeting the changing needs of growers across the country. Van Gaal is also a published researcher whose work on gene flow at the University of Minnesota is well noted. “I am looking forward to strengthening our current platform of products and supporting the development of new products that will serve and expand our customer base,” says Van Gaal.

About Douglas Scientific

Douglas Scientific is dedicated to making our world a better place by delivering innovative laboratory automation. Array Tape is engineered to be a ubiquitous media for high throughput processing, driving more data at lower costs. The ultra high throughput Nexar® (liquid handling system), Soellex™ (thermal cycler) and Araya® (scanner) are optimized for Array Tape and virtually eliminate manual handling and complex robotics required for microplate-based systems. Douglas Scientific is a wholly owned company of Douglas Machine Inc., with corporate offices located at 3600 Minnesota Street, Alexandria, MN 56308.
