

FOR IMMEDIATE RELEASE

### **Dr. Satish Rai Joins Douglas Scientific**

*Alexandria, MN, July 28, 2011* – Douglas Scientific, a provider of Array Tape™ for high throughput screening in bioscience laboratories, today announced the appointment of Satish Rai Ph.D. as Director of Scientific Operations.

Rai is well respected in the Biotechnology industry and brings over 13 years of comprehensive experience to Douglas Scientific. His extensive experience includes of early stage technologies, managing DNA testing laboratories to develop genetic markers as well as providing consulting services to seed companies, DNA testing labs, and biotechnology companies. He has organized national and international workshops, and presented papers related to the detection of molecular traits.

“Satish has a strong background in plant genetics, molecular breeding and automation,” said Craig McLain, Vice President of Market Operations at Douglas Scientific. “There is no doubt his knowledge, experience and personal approach will help us deliver innovative laboratory automation to our clients around the world.”

#### **About Douglas Scientific**

Douglas Scientific is dedicated to making our world a better place by delivering innovative laboratory automation. Array Tape is engineered to be a ubiquitous media for high throughput processing, driving more data at lower costs. The ultra high throughput Nexar® (liquid handling system), Soellex™ (thermal cycler) and Araya® (scanner) are optimized for Array Tape and virtually eliminate manual handling and complex robotics required for microplate-based systems. Douglas Scientific is a wholly owned company of Douglas Machine Inc., with corporate offices located at 3600 Minnesota Street, Alexandria, MN 56308.
